SUMMARY

I'm a full-stack developer who builds web applications with Python, Django, Django REST Framework, React, and relational databases. Comfortable across both the backend and frontend, including database design, REST APIs, authentication, and responsive interfaces. Currently exploring AI and machine learning alongside my web development work.

EDUCATION

B.Sc. in Engineering, Information and Communication Technology (ICT)

Mawlana Bhashani Science and Technology University (MBSTU)

3rd Year, 2nd Semester (Session 2022–23) | CGPA: 3.57 / 4.00 (up to 4th Semester)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++

Frameworks & Libraries: Django, Django REST Framework (DRF), React, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite

Concepts: REST API Design, JWT Authentication, Responsive Web Design, Machine Learning Fundamentals

Tools: Git, GitHub, VS Code, Postman, Vite, Weka

PROJECTS

Chest X-Ray Screening Assistant | *Java 17, Weka 3.8.6, React, Tailwind CSS, Vite*

- Trained a Weka Random Forest model on handcrafted X-ray image features to classify chest X-rays as COVID-19, Pneumonia, or Normal, reaching around 90.65% accuracy in 10-fold cross-validation.
- Wrapped the model in a Java REST API and built a React + Tailwind CSS frontend so a user can upload an X-ray and get a prediction back in real time.

ModernScribe: Blogging Platform | *Django, PostgreSQL, Tailwind CSS*

- Built a blogging platform in Django where users can publish posts, like, and comment, with authentication and a PostgreSQL-backed data layer.
- Styled the frontend with Tailwind CSS for a clean reading experience and deployed it live on Render.

Weather App | *React*

- Built a weather forecast app in React that pulls live data from a public weather API, either from a city search or by auto-detecting the user's location through the browser's geolocation.
- Used this project mainly to get comfortable with async data fetching and handling real-world API responses in React.

Additional Practice Project | *React*

- React Shopping Cart: cart interface built to practice state management and component structure in React.
